FEDERAL AIRPORTS AUTHORITY OF NIGERIA HEADQUARTERS

Murtala Muhammed Airports, Lagos, Nigeria

Policy Statement and Commitment to Carbon Emission Reduction

1. As an airport company, the Federal Airports Authority of Nigeria (FAAN) under its crop of leadership looks forward from time to time, for opportunities to demonstrate our commitment to carbon reduction through internal initiatives and by adapting to global initiatives and international best practices on carbon reduction.
2. Our commitment to carbon reduction is based on the common understanding of the present challenges of global warming and climate change arising from the high degrees of CO₂ emission in the atmosphere, to which our industry is a contributor.
3. To show continuous commitment to carbon reduction, the Federal Airports Authority of Nigeria already has a well-established Department in charge of airports environmental management with a team specifically saddled with the responsibility of carbon footprint monitoring, measurement, management and reduction across the airports in Nigeria.
4. Our commitment to carbon emission reduction shall be based on this policy statement from time to time.

Capt. Muktar Y. Muye
Director of Airport Operations
